

Daily Labor, Equipment, Material (LEM) Tracking from the Field

Construction companies in the Oil & Gas industry are always on the move, going from one job site to the next. To accurately track resources, costs and productivity, you need to capture labor, equipment, and materials when and where the work is happening ... in the field.

That's why you need **Field 2 Office** ...

What is Field 2 Office?

It's cloud-based software that allows you to capture crew hours, equipment used, and materials purchased directly from the job site. Using a laptop, tablet, or mobile device, the foreman records the data, prints out the daily ticket, and reports back to the office and the client - on location, every day. Field 2 Office also features:

- Real time Daily field reporting drives payroll and billing
- Built-in safety management and incident tracking
- Equipment costing, maintenance & service plans
- Automatic calculation of Overtime & Double-time
- Connect to powerful Project Management & Job Costing
- Integrated with popular accounting solutions such as Sage Timberline Office, Simply Accounting and QuickBooks

It's Time to Ditch the Spreadsheets and take a look at Field 2 Office Today!
